DETAILED ACTION

1. This communication is in response to amendment filed 5/11/06.

Response to Amendment

2. No have been amended. The applicant has improperly numbered the claims. The examiner suggests that the claims be presented in the following format.

1. (Previously cancelled)
2. (Previously cancelled)
3. (Currently amended) or (currently pending)
4. (Previously cancelled)

The examiner has issued a new non-final office action to present to the applicant many deficiencies present in the present application. The examiner feels that, in consideration of the serious deficiencies present both in the specification and the claims no meaningful prior art Pertinent to the claimed invention can be searched beyond what was presented in the first office action mailed 12/5/05.

An examination of this application reveals that applicant is unfamiliar with patent prosecution procedure. While an inventor may prosecute the application, lack of skill in this field usually acts as a liability in affording the maximum protection for the invention disclosed. Applicant is advised to secure the services of a registered patent attorney or agent to prosecute the

Art Unit: 3693

application, since the value of a patent is largely dependent upon skilled preparation and prosecution. The Office cannot aid in selecting an attorney or agent.

A listing of registered patent attorneys and agents is available on the USPTO Internet web site <http://www.uspto.gov> in the Site Index under "Attorney and Agent Roster." Applicants may also obtain a list of registered patent attorneys and agents located in their area by writing to the Mail Stop OED, Director of the U. S. Patent and Trademark Office, PO Box 1450, Alexandria, VA 22313-1450

3. Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 3 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claim 3 comprises "means of analyzing" and "means of determining". In the context of the disclosure, the means are elements of a computer code or computer program. Since the computer codes themselves cannot produce a useful result without being acted upon by a computing device (a computer or processor) the claimed invention is inoperative and therefore lacks utility.

Amend claim to read "a computer,
a computer-readable memory device in
communication with the computer comprising the following:

means for analyzing..

means for determining.. "

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112 :

Art Unit: 3693

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 3 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The specification fails to describe the following features in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

--expressing risk associated with a company's assets in common currency by analyzing the company's transactions. (see limitation c) of claim 3.)

ranking computer-based transaction by risk expressed in common currency. (see limitation d) of claim 3.)

It is the examiner's position that nothing within the scope of the claims is enabled.

The applicant's is requested to provide detailed explanation, as to, how and where, the specification as originally filed, describes the aforementioned limitations in such a manner as to reasonably convey to one skilled in the relevant art the inventor, at the time the application was filed, had possession of the claimed invention.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 USC § 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 3 is rejected under 35 USC § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The preamble of claim 3 states that it is directed to a method claim. However, the body of the claim recites elements of an apparatus or a system ("Means of.."). It is interpreted that the claim preamble is "A system of ..".

Art Unit: 3693

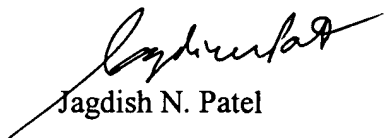

Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: relationship of the means of analyzing c) to means of determining d). In the present form no structural cooperative relationship exist between the two elements of the claim. Therefore, the examiner cannot ascertain the applicant's invention.
